From Dust to Digital-Maja Kominko 2015-02-16 Much of world's documentary heritage rests in vulnerable, little-known and often inaccessible archives. Many of these archives preserve information that may cast new light on historical phenomena and lead to their reinterpretation. But such rich collections are often at risk of being lost before the history they capture is recorded. This volume celebrates the tenth anniversary of the Endangered Archives Programme at the British Library, established to document and publish online formerly

inaccessible and neglected archives from across the globe. From Dust to Digital showcases the historical significance of the collections identified, catalogued and digitised through the Programme, bringing together articles on 19 of the 244 projects supported since its inception. These contributions demonstrate the range of materials documented — including rock inscriptions, manuscripts, archival records, newspapers, photographs and sound archives — and the wide geographical scope of the Programme. Many of the documents are published here for the first time, illustrating the potential these collections have to further our understanding of history.

Blue Adept-Piers Anthony 2009-06-03 In this brilliant continuation of the epic adventure that began in Split Infinity, Piers Anthony again proves himself a master of both fantasy and science fiction For Stile, life was a matter of shuttling madly between two worlds, with the problems growing greater on each. On the

science world of Proton, he was a serf, trying to prove his right to exist by competing in the Great Games. On Phaze, where only magic worked, he was the Blue Adept, trying to master the powers of sorcery. And on both worlds, someone was trying to assassinate him. Aside from winning increasingly difficult contests with no time to prepare, all he had to do was win the love of the Lady Blue, fight a dragon, discover the ultimate weapon—and, of course, seek the paranoid Adept or the all-powerful Citizen who was trying to kill him! And now, just when things were growing impossible, he had to fight a mortal duel with the unicorn Herd Leader, against whom his magic powers were useless!

which materials, techniques, colour, scale, orientation and visibility inform the creation of inscribed objects and spaces, as well as structure subsequent engagement, perception and meaning making. Covering a temporal span of some 5000 years, from c.3200 BCE to the present day, and ranging in spatial context from the Americas to the Near East, the chapters in this volume bring a variety of perspectives which contribute to both specific and broader questions of writing materialities. The authors also aim to place past graphical systems in their social contexts so they can be understood in relation to the people who created and attributed meaning to writing and associated symbolic modes through a diverse array of individual and wider social practices.

Systematic Reviews in Health Care-Paul Glasziou 2001-11-08 What do we do if different studies appear to give different answers? When applying research to questions for individual patients or for health policy, one of the challenges is interpreting such apparently conflicting research. A systematic review is a method to systematically identify relevant research, appraise its quality, and synthesize the results. The last two decades have seen increasing interest and developments in methods for doing high quality systematic reviews. Part I of this book provides a clear introduction to the concepts of reviewing, and lucidly describes the difficulties and traps to avoid. A unique feature of the book is its description, in Part II, of the different methods needed for different types of health care questions: frequency of disease, prognosis, diagnosis, risk, and management. As well as illustrative examples, there are exercises for each of the sections. This is essential reading

for those interested in synthesizing health care research.

Babylonian Creation Myths-Wilfred G. Lambert 2013-10-24 For much of the last half of the twentieth century, W. G. on the known exemplars, as well as coverage of a number of other texts that bear on, or are thought to bear on, Mesopotamian notions of the origin of the world, mankind, and the gods. New editions of seventeen additional "creation tales" are provided, including "Enmesharra's Defeat," "Enki and Ninmah," "The Slaying of Labbu," and "The Theogony of Dunnu." Lambert pays special attention, of course, to the connection of the main epic, Enuma Elish, with the rise and place of Marduk in the Babylonian pantheon. He traces the development of this deity's origin and rise to prominence and elaborates the relationship of this text, and the others discussed, to the religious and political climate Babylonia. The volume includes 70 plates (primarily hand-copies of the various exemplars of Enuma Elish) and extensive indexes.

Motor Control-Anne Shumway-Cook 2012

Motor Control is the only text to bridge the gap between current motor control research and its applications to clinical practice. The text prepares therapists to examine and treat patients with problems related to balance, mobility, and upper extremity function, based on the best available evidence supporting clinical practice. This edition provides the latest research findings and their clinical applications in postural control, mobility, and upper extremity function. Drawings, charts, tables, and photographs are also included to clarify postural control and functional mobility, and laboratory activities and case studies are provided to reinforce key concepts. Videos on the back-of-book DVD examine motor control deficits, including deficits in postural control, mobility, and upper extremity

function in different types of neurologic pathology (stroke, cerebellar pathology, cerebral palsy, and Parkinson's disease) as well as in balance impaired elders. These videos can be viewed in their entirety or in the following segments: impairments, postural control, mobility, and upper extremity control. This video enhances the clinical coverage found in the textbook.

Human Rights, Sexual Orientation and Gender Identity in the Commonwealth-

Corinne Lennox 2013 "Human rights in relation to sexual orientation and gender identity are at last reaching the heart of global debates. Yet 78 states worldwide continue to criminalise same-sex sexual behaviour, and due to the legal legacies of the British Empire, 42 of these - more than half - are in the Commonwealth of Nations. In recent years many states have seen the emergence of new sexual nationalisms, leading to increased enforcement of colonial sodomy laws against men, new criminalisations of sex between women and discrimination against transgender people. [This book] challenges these developments as the first book to focus on experiences of lesbian, gay, bisexual, transgender and intersex (LGBTI) and all non-heterosexual people in the Commonwealth. The volume offers the most internationally extensive analysis to date of the global struggle for decriminalisation of same-sex sexual behaviour and relationships."--Abstract, website.

Ancient Texts for the Study of the Hebrew

Bible-Kenton L. Sparks 2005-06-01 The Hebrew Bible represents no mere collection of books but a stunning array of literary genres. To fully illuminate the history and culture of the Old Testament, it is necessary to compare these ancient writings to similar texts written concurrently by Israel's neighbors. Beginning with an overview of the important literary archives of the ancient Near East, Sparks provides exhaustive references to the ancient literary counterparts to the Hebrew Bible's major genres. Surveying the ancient writings found throughout Egypt, Mesopotamia, Anatolia, and Palestine, Sparks provides a brief summary of each text discussed, translating brief portions and linking them to literarily similar biblical passages. Exploring over thirty genres--wisdom, hymns, love poetry, rituals, prophecy, apocalyptic, novella, epic legend, myth, genealogy, history, law, treaty, epigraphic materials, and others--it offers an exemplary
